Martin Tolich : Qualitative Ethics in Practice (Developing Qualitative Inquiry) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Qualitative Ethics in Practice (Developing Qualitative Inquiry):

Neither ethics committees nor qualitative researchers can predict the types of ethical dilemmas that will happen in the field, only that they will routinely occur. In *Qualitative Ethics in Practice*, a team of fifteen top researchers from various disciplines and nationalities offer ethical strategies unique to qualitative researchers for those "big ethical

moments" beyond what can be predicted by ethics committees. Ideally structured for qualitative classes that tackle ethics issues, the book -calls for an ethical code unique to the practice of qualitative research;-uses a variety of cases from education, community development, tourism, family, and other settings to examine how researchers addressed ethical dilemmas in practice, including the infamous Belfast Project;-highlights some relevant models and programs being developed that may lead to solutions.nbsp;

About the AuthorMartin Tolich is an Associate Professor in the Sociology Department at the University of Otago in New Zealand. He has been teaching and researching sociology for more than 25 years. His many research interests include employment, ethics review boards, Maori consultation processes, and experiential research training for students. He has published extensively including two recent books ndash; Planning Ethically Responsible Research (with Joan Sieber, 2013) and Getting Started: An Introduction to Research Methods (with Carl Davidson, 2011).
