The second edition of Regional Economics provides a comprehensive and up-to-date treatment of regional economics. This fully revised edition includes key theoretical developments of the last ten years. Topics included span

from the earliest location theories to the most recent regional growth theories. It is also enriched by the recent debate on smart specialization strategies recently developed by the EU for the design of new cohesion policies. Key elements covered in the new edition include: proximity and innovation theories, the concept of territorial capital, the debate on the role of agglomeration economies in urban growth. This textbook is for undergraduate students in regional and urban economics as well as spatial planning courses.

About the Author Roberta Capello is Full Professor of Regional and Urban Economics, Politecnico di Milano, Italy.
