**From Routledge : Rural Livelihoods and Poverty Reduction Policies (Routledge Studies in Development Economics)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Rural Livelihoods and Poverty Reduction Policies (Routledge Studies in Development Economics):

This important new collection of contributions brings together current thinking on poverty reduction and rural livelihoods in developing countries. As well as leading economists in the field such as Frank Ellis and Chris Barrett, there are a number of contributors from developing countries themselves. The book examines both macroeconomic and microeconomic phenomena and contains wide range of case studies. Skilfully exposing the gap that exists between

the rhetoric of poverty reduction strategies in capital cities and the practice of public sector delivery in rural areas, this key text will be essential reading for advanced students and researchers in the fields of rural development, rural livelihoods, poverty reduction strategies and Sub-Saharan Africa development as well as advisors and practitioners in international organizations.

About the Author Frank Ellis is Professor in Agricultural Economics and Chief Executive of the Overseas Development Group at the University of East Anglia. He is an agricultural economist who has worked on agricultural price and marketing policies in Latin America, Africa and Asia, and who has general interests in the areas of agricultural policy and rural development. H. Ade Freeman is Economist at the International Crops Research Institute, Nairobi, Kenya. He has published extensively on themes related to agricultural and livestock productivity, rural livelihoods and poverty reduction in developing countries.
