found much more than that in the pages of this book. The author explores feelings and relationships behind the business plan that prompted me to deal with more than the surface aspects of running your own business. Don't get me wrong, it's not a self-help book - it just realistically explores common things women do and feel while running a business and it all rang true with me. I appreciated all the examples of all the women in the book and learning about what steps they took on the pathway to success. It's both inspiring and encouraging to know that against all odds, it can be done and has been done many times. I read the book with a stack of post-it notes because Mrs. Monosoff covers so much ground it made my mind alive with ideas that I had to write as they came to me. Thank you for putting together such a helpful book for those of us that are trying to figure it all out in the business world and be moms too. Best of luck to other mom entrepreneurs. 0 of 0 people found the following review helpful.
