Richard E. Sall : Strategies in Workers' Compensation before purchasing it in order to gauge whether or not it would be worth my time, and all praised Strategies in Workers' Compensation:

0 of 0 people found the following review helpful. Five StarsBy Lisa C CoyleInformative book and in good condition0 of 1 people found the following review helpful. Waste of time!By Samantha CohenThis book gave me no advice on how to manage work comp patients in my practice. I was hoping there would be more advice on how to discuss issues during peer to peer discussions, but this book did nothing to help at all! It was a waste of money!0 of 1 people found the following review helpful. Five StarsBy SparrowHawkThank you!

Strategies in Workers' Compensation, written with the healthcare medical professional in mind, describes the nuts and bolts of workers compensation. The book details the history, laws, various stakeholders, costs, and problems encountered by healthcare providers. An emphasis is placed on the "difficult patient" with regard to management techniques for doctors, insurance companies, and employers. In addition, Strategies in Workers' Compensation offers reference material to aid in understanding the complex workers' compensation system. Human resource professionals, insurance adjusters, case managers, and nurses will find the information contained in this book useful in confronting the myriad of problems that arise within their respective fields. This book is a valuable resource for anyone who deals with the injured worker.

About the Author Richard E. Sall is an Occupational Physician at Inland Industrial Medical Group, Ontario, California. The author received his Doctorate of Medicine from Wayne State University Medical School and is Board Certified in Occupational Medicine, General Surgery, and Forensic Medicine. His experience and training has resulted in an extensive knowledge of Occupational Medicine, industrial hygiene principles, toxicology, epidemiology of occupational illnesses, and workers' compensation systems.
