B. Espen Eckbo : Takeover Activity, Valuation Estimates and Merger Gains: Modern Empirical Developments: 1 (Corporate Takeovers) before purchasing it in order to gage whether or not it would be worth my time, and all praised Takeover Activity, Valuation Estimates and Merger Gains: Modern Empirical Developments: 1 (Corporate Takeovers):

0 of 0 people found the following review helpful. Best in class on explaining MA wavesBy Ng Hon MingBest book on

MA research - on explaining why MA occurs- by academic researches

A selection of republished corporate finance articles and book chapters that can serve as an advanced corporate finance supplementary text for courses that use no textbooks. Combining convenience and an affordable price with retypeset pages and a high-quality index, the 600 pages of volume one, "Takeover Activity, Valuation Estimates and Sources of Merger Gains", focus on classical issues such as the existence and source of merger waves, empirical estimates of takeover announcement returns and the division of takeover gains between bidders and targets, and tests for potential sources of takeover gains (primarily involving estimation of industry wealth effects of takeovers), introducing students to modern scientific evidence about corporate takeovers. Including an index and new introduction, this volume will simplify and facilitate students' interaction with new concepts and applications. Provides a status report about modern scientific evidence on corporate takeovers. Exposes students to new methods and empirical evidence while reading high quality primary material. Offers a concise and cost-efficient package of journal and book articles for advanced corporate finance students.

From the Back Cover This selection of republished corporate finance articles and book chapters can serve as an advanced corporate finance textbook. Combining convenience with retypeset pages and a high-quality index, this volume and its companion, "Bidding Strategies, Financing, and Corporate Control," introduce students to modern scientific evidence about corporate takeovers. Its contents include classical issues such as the existence and source of merger waves, empirical estimates of takeover announcement returns and the division of takeover gains between bidders and targets, and tests for potential sources of takeover gains (primarily involving estimation of industry wealth effects of takeovers). Featuring a new introduction, this volume will simplify and facilitate students' interaction with new concepts and applications. About the Author Professor B. Espen Eckbo holds the Tuck Centennial Chair in Finance. He is also Faculty Director of Tuck's Lindenauer Center for Corporate Governance, which he founded in 1999. He teaches advanced MBA courses in the areas of corporate finance, corporate takeovers and international corporate governance. Professor Eckbo, who received a PhD in financial economics from the University of Rochester in 1981, has published extensively in the top finance journals in the areas of corporate finance, investment banking, and the market for corporate control. He is a recipient of an honorary doctoral degree from the Norwegian School of Economics, the prestigious Batterymarch Fellowship, as well as several outstanding-paper awards. He is a research Associate of the European Corporate Governance Institute (ECGI), and a frequent keynote and invited seminar speaker. He was called in 2009 by the U.S. Congress to testify on issues concerning the government's large equity ownership positions in companies rescued under the Troubled Asset Relief Program (TARP).
