From Routledge : Taxation: A Fieldwork Research Handbook before purchasing it in order to gauge whether or not it would be worth my time, and all praised Taxation: A Fieldwork Research Handbook:

Taxation is a subject of enquiry that cuts across a range of disciplines, including law, economics, politics, psychology, history and accountancy, to name a few. However, research into taxation as a social and institutional phenomenon — rather than as abstraction from the real world — is largely neglected. Taxation: A Fieldwork Research Handbook opens up new avenues of enquiry in the research of taxation by offering

suggestions on how research might be conducted into actual tax practice, rather than abstract models. This book: Introduces tax as a field of enormous potential for research to all social scientists Explains the methodological issues relating to tax research Provides new opportunities for tax researchers to widen the scope of their enquiries Encourages researchers to think differently about this subject Given the importance of taxation to modern society, not only as a revenue raising mechanism, but also as a tool of governance used to influence social actors, this unique text is a vital read for any social science researcher interested in this subject.

'This unique book offers new ways of thinking for practitioners and researchers to explore tax policy, its practical application and its critical importance in modern society.' John Hasseldine, University of New Hampshire, USA 'This book on tax research fills an important gap in tax literature. It wets the appetite for tax research by cogently discussing methodology and by providing clear summaries of key theories and their application, revealing tax as a socio-political phenomenon.' Helen Oakes, Keele University, UK 'A work of exemplary breadth and scholarship which should serve as a clarion call for further research into taxation from a social science perspective.' John Ward, Emeritus Professor of Taxation, University of Ulster, UK 'This volume contains some excellent contributions to fieldwork research in taxation. Both experienced researchers and those new to the fascinating world of tax research will find this an interesting and useful resource.' Simon James, University of Exeter Business School, UK and Fellow of the Chartered Institute of Taxation 'Lynne Oats has created a useful, practical book that will undoubtedly encourage new and exciting research in the tax field. This is timely given that the need to better understand this subject is more in the public consciousness at present than it has been at any time in recent history, yet has not always been well served by the approaches taken to its exploration.' Andrew Lymer, Professor of Accounting and Taxation, University of Birmingham, UK 'This book, which includes contributions by a number of prominent tax researchers, reflects the multidisciplinary nature of tax research by bringing together alternative methodologies, and explaining the application of each.' Helen Hodgson, University of New South Wales, Australia

About the Author Lynne Oats is Professor of Taxation and Accounting at the University of Exeter, UK. Her research interest is taxation policy and practice in social and institutional contexts, in both historical and contemporary settings. She has published extensively in the field and is co-author of three books, *Taxation Policy and Practice* (Fiscal Publications, 2011), *Principles of International Taxation* (Bloomsbury Professional, 3rd edn 2012) and *Accounting Principles for Tax Purposes* (Bloomsbury Professional, 2010). She is Assistant Editor of *British Tax* and is Vice Chair of the UK Tax Research Network.
