AmazingBy Nathan DroblynFor the money, I would have bought this book again. I love that it's a hardcover, and this will be one that I keep and not give away.The information is presented from a basic view on most topics, which will help novices a lot. I found the first half of the book fascinating... and had to read some of it more than once.When he started getting into Options, I flipped through this section as he really didn't do a very good job explaining that, and there are a LOT of other books that explain that side of trading much better.Overall, it's a keeper. Lots of stock charts to talk about and different tech analysis tools explained in one book on a basic level. If you want more information about any particular tool/indicator... you can dog ear the page and come back to to find a book on that particular area.

Most investors know that highly profitable trading methods employ a number of technical analysis tools. Unfortunately, choosing the right ones is easier said than done. In *Technical Analysis Tools*, professional trader Mark Tinghino cuts through the clutter. First, he demystifies the essential technical approaches such as chart patterns, indicators, Market Profile, and Elliott Wave. He also introduces a new instrument of his own: the cyclical model, which helps identify trend reversals. Next, he provides techniques that turn the tools into trading programs. Those techniques include how to time buying and selling, how to account for the effect of fundamental analysis on technical analysis, and how to use spreads to effectively manage risk. Real-world examples, objective analyses of how successful investors implement their own trading systems, and dozens of charts and graphs make *Technical Analysis Tools* exceptionally clear and practical.

About the Author Mark Tinghino is a commodity trading adviser (CTA). He has taught numerous online seminars on technical analysis at the Chicago Board of Trade and the Chicago Mercantile Exchange. He contributed chapters to *Tricks of the Active Trader* by Neal Weintraub and has written articles for *Futures* magazine and *TradeSOURCE* magazine. Tinghino has spent decades developing a unique model for market timing, which uses a combination of several hundred separate cycles. Visit www.tinghino.net for information on his newsletter and ongoing research.
